DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-8 and 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bilas et al. (US 5,233,511) in view of PowerLogic Circuit Monitor-Series 2000 (Class 3020, Square D/Schneider Electric Product Literature, 6 pages, dated 1999).

Bilas teaches an electrical equipment enclosure (fig. 1b) comprising: an electrical enclosure (10), networked power monitoring equipment (32) mounted in said electrical enclosure, and a communications port (38) mounted to said enclosure and accessible externally from said enclosure (shown in fig. 3) and operatively coupled with said networked power monitoring equipment (shown in fig. 2) requiring a local communications connection (40 and 41, fig. 2) for connecting said networked power monitoring equipment with equipment outside of said enclosure (see also col. 3, line 49 through col. 4, line 68) (claim 1); wherein said enclosure is a power distribution enclosure (see fig. 1a) (claim 2); wherein said enclosure is a motor control center (each circuit breaker comprising a motor being controlled) (claim 3); wherein said enclosure is a circuit breaker panel enclosure (20,s being circuit breakers) (claim 4); wherein said

Application/Control Number: 10/679,041

Art Unit: 2835

enclosure is an electrical switchgear cabinet (20's being electrical switches with related mechanisms) (claim 5); wherein said enclosure is an electrical unit substation (see fig. 7) (claim 6); wherein said enclosure is an electrical distribution switchboard (see fig. 1b) (claim 7); an Ethernet hub (38) providing a plurality of Ethernet connection ports (40 and 41) mounted inside of said enclosure and operatively connected with said local communications port (on board 31) mounted to said enclosure and with said power monitoring equipment (fig. 5a) (claim 8); wherein said enclosure has an accessible front surface (shown in fig. 3), and wherein said network port is mounted to and accessible at said front surface (shown in fig. 3) (claim 9); wherein said communications port is a low-power wireless port (see col. 4, lines 4-7) (claim 11); and a method of providing a local communications connection being disclosed in the specification (claims 12-13 and 15).

Bilas fails to teach the wireless port 41 being mounted to the enclosure and being an infrared port (claims 1 10, 12 and 14).

PowerLogic Circuit Monitor-Series 2000 teaches a wireless communications port being an optical communications port and being built into the front panel as listed on page 1 and stated in section Optical Communications Interface on page 5.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Bilas with the communications port taught by PowerLogic Circuit Monitor-Series 2000 for engineers to retrieve data directly from the front panel, since both the electronic equipment taught by Bilas and the PowerLogic Circuit Monitor-Series 2000 are for power system monitoring.

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 12 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
